Ishfaq Nazir

AIML Engineer
ishfaqnazir24@gmail.com | 8493929303 | Tral
HackerRank | **LeetCode** | **Linkedin** | **GitHub**

Education

Goverment Collage Of Engineering and Technology — Ganderbal, Kashmir
Computer Science & Engineering B-tech — December 2022 - December 2026
CGPA: 9.2

Experience

NextGen | **Full-Stack Developer, Intern** — Srinagar, India | Sep 2025 - Current

Developed RESTful APIs for efficient data exchange between frontend and backend systems.
Collaborated with frontend developers to effectively integrate user-facing elements with server-side logic.
Wrote unit tests to ensure code reliability and maintainability during development.

Skills

Programming Languages:	C++, Java, Python, JavaScript
Libraries/Frameworks:	React, Django, NumPy, Pandas, Matplotlib, Scikit-Learn, Keras, TensorFlow, OpenCV
Tools / Platforms:	Git, Git Bash, Jupyter Notebook, Google Colab, Kaggle, Postman, GitHub
Databases:	MySQL, PostgreSQL, MongoDB

Projects / Open-Source

AlgoArena | **Link** — *Python,JavaScript, HTML, CSS*

Algo Arena is an ed-tech platform designed to help learners master coding and problem-solving from school level to competitive exams like UPSC through structured challenges and real-world scenarios.
It offers interactive learning paths, practice problems, and gamified experiences to make algorithm learning engaging and practical.

loan-approval-system | **Link** — *JavaScript, Python, CSS, HTML, Shell*

An AI-powered Loan Approval System that predicts loan decisions using machine learning and provides confidence scores, risk levels, and explainable insights through SHAP.
It integrates a React frontend, FastAPI backend, and ML pipeline to deliver real-time, data-driven loan analysis for smarter financial decision-making.

Virtual-Writing-Board | **Link** — *JavaScript, Python, CSS, HTML*

An AI-powered virtual whiteboard that uses hand gesture recognition to enable real-time drawing in the air with low-latency collaboration across multiple users.
It combines React, Node.js, and computer vision (MediaPipe + OpenCV) to deliver a scalable, gesture-controlled collaborative canvas with smooth rendering and live synchronization.

Certifications

- MERN Stack Developer - **EduPi School**
- Fundamentals of Deep learning - **NVIDIA**

Honors & Awards

- Won highSchool Hackathon at MLH 2023
- Won front-end-frenzy Hackathon 2024
- Won GCET KASHMIR HACHATHON 2025
